EFFECTIVE DATE: 10.6.2022

LEAD WATER SERVICE LINE REPLACEMENT COST-SHARING PROGRAM

DESCRIPTION

The lead water service line replacement cost-sharing program is designed for residents who are interested in replacing their existing lead water service lines. The program is voluntary and available to all residential properties that have lead service lines serviced by the Villages water distribution system. Preapproval from the Public Works Department is required to participate.

Under the program, the Village will reimburse homeowners 100% of the cost to replace the service line from the water main to the water shutoff valve as, known as the B-box, and 2/3 of the cost from the shutoff valve to the water meter.

The maximum reimbursement is \$10,000, plus permit fees which will be issued after the work is completed. The work must be performed by a plumbing contractor that is licensed and bonded to work in the Village of Mount Prospect. Residents are responsible for hiring their own plumbing contractor to perform the work.

TARGET

The target area for this program is all properties serviced by the Village's water distribution system that may potentially have lead and galvanized water service lines, or that may contain lead solder.

GOAL

The goal is to remove lead materials from the Village's water distribution system, thus increasing the safety and health of our residents.

OBJECTIVE

The objective is to remove lead and galvanized water services.

BENCHMARK

1. Eliminating of 7% of lead water services in the distribution system annually.
