

Introduction

Good news! The Village will be installing two (2) new sidewalk sections along the north side of Oakton Street, between the I-90 Tollway Overpass and Lexington Drive, to fill in gaps in the sidewalk system between Elmhurst Road and the I-90 Tollway Overpass. The project is scheduled to begin this spring. The contractor for the project is Schroeder & Schroeder, Inc.

What Kind of Work Will Be Completed?

In general, the progression of work will be:

- ❑ Layout location of sidewalk using wood stakes.
- ❑ Excavation and installation of formwork for the new sidewalk.
- ❑ Installation of stone base for the new sidewalk.
- ❑ Pouring of concrete for the new sidewalk.
- ❑ Repair of driveway aprons affected during construction.
- ❑ Restoration with topsoil and sod of the parkway areas damaged during the construction activities.

What About Access To My Business?

Access to your business will be maintained throughout the construction period. Sidewalks through driveways will be done in two phases if no other access is available to ensure they always remain open.

Will services to my business be affected?

There will be no changes to your regular services, such as garbage pickup, mail delivery, or emergency Police and Fire services. However, there may be times during the day when construction activities temporarily block lanes. Please use caution when driving through the construction zone. If you have a sprinkler system, please notify the Public Works Department. Per Village Ordinance, it is your responsibility to temporarily relocate, reinstall, or repair any of these items during construction.

Project Information

A project web page has been created and can be found on the Village website at www.mountprospect.org under Departments, Public Works, Village Infrastructure Projects, Construction Projects, Pedestrian Improvement Projects, and Oakton Street New Sidewalk Project.
